

**CIMCOOL® METALWORKING FLUIDS**

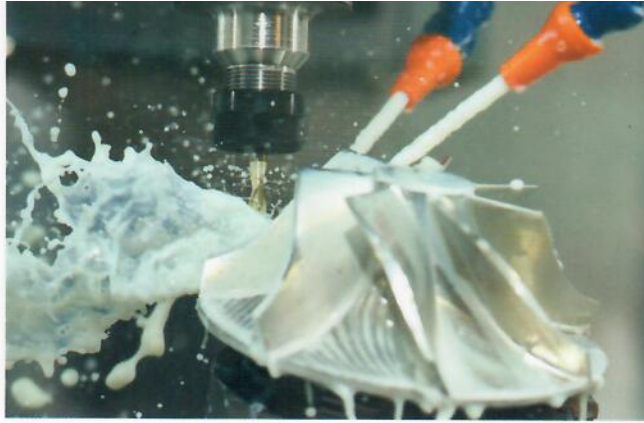

**EVERY DROP IS WORTH IT!**

**CIMCOOL®**  
FLUID TECHNOLOGY

**MILACRON®**

## **CIMCOOL PRODUCTS, EVERY DROP IS WORTH IT!**

A stable and cost-effective production process is the sum of all its interdependent components; machine, tool, work piece quality, software, machine operator and of course, the metalworking fluid.

### **PRODUCT LINE**

Each metalworking operation has a unique component 'team' and requires a specific metalworking fluid to optimize its performance. Cimcool's product line has been designed to meet these requirements.

Cimcool also meets your requirements for hydraulic oils, slideway oils and equipment.

### **DEDICATED MARKETS**

Cimcool has developed the knowledge and experience to serve many specialised industries, such as aerospace, automotive and the tube and pipe sector. We have developed dedicated products to meet the unique demands of these markets.

### **INCREASE PRODUCTIVITY AND SAVINGS**

A carefully selected and applied metalworking fluid can provide the following performance benefits:

- Improve tool life
- Reduce machine and process downtime
- Reduce additive use and low top-up rates
- Increase sump life
- Improved the quality of the working environment

### **CIMSTAR®**

Water soluble semi-synthetic cutting and grinding fluids

### **CIMTECH®**

Water soluble synthetic cutting and grinding fluids

### **CIMPERIAL®**

Emulsion cutting and grinding fluids

### **CIMCLEAN®**

Industrial cleaners and parts washers

### **CIMGUARD®**

Protection against corrosion

### **CIMFREE®**

Metalworking fluids based on renewable raw materials

### **CIMTUBE®**

Fluids for the tube and pipe industry

### **CIMGLASS®**

Fluids for the glass industry

### **MILFORM®**

Metalforming products

### **MILPRO®**

Neat cutting and grinding oils
